

ISO 28000 Security and resilience management system

Service information sheet. ISO Management Systems. Information checked 11 October 2026.

In brief

ISO 28000 is the international standard for security and resilience management systems, with a strong supply chain focus. It helps organisations identify security threats and protect people, goods and operations. ICFC supports implementation, audits and training.

What it is

ISO 28000 sets requirements for a security management system covering risks to the organisation and its supply chain.

Who it is for

Logistics, ports, freight forwarders, warehousing and manufacturers with high-value supply chains.

How ICFC helps

Service	What we offer
Audit	Third-party audits: Third-party certification audits for ISO 28000 are delivered by our auditors on behalf of accredited certification bodies. The certificate is issued by the certification body, not by ICFC. Second-party audits: Supplier and partner audits against ISO 28000 on behalf of your organisation, with clear findings you can act on. Internal audits: First-party internal audits of your security and resilience management by experienced auditors, combinable with other standards in one integrated audit.
Consulting	Funding: We explain which scheme, if any, applies and what it requires before you commit. Non-grant: A fixed-scope engagement: gap assessment, documentation, implementation coaching, internal audit and management review, and support through the formal audit or assessment. How we work: Practical, proportionate systems that your staff can run after we leave.
Training	Classroom: Public and in-house classroom courses on ISO 28000: awareness, implementation and internal auditor levels. Online LMS: Self-paced and live-online courses on the ICFC Digital LMS, with progress tracking and certificates of completion. Funding: Funding depends on each course's approval status, shown on the course page in the LMS.

Funding

Not on the EDGE Standards list. We did not find this standard on the EDGE Standards list when we checked. Ask us about non-grant options or other schemes that may apply.

Impartiality

Impartiality comes first. Every engagement begins with a conflict-of-interest check. We keep consulting and auditing roles separate, and our auditors never audit, on behalf of a certification body, an organisation that ICFC has consulted on the same scope within the period set by that body.

Frequently asked questions

Q. Is ISO 28000 only for logistics?

A. No. It applies to any organisation, though it is most common in supply chain and logistics.

Q. Is ISO 28000 on EDGE?

A. We did not find ISO 28000 on the EDGE Standards list when we checked. Ask us about other options.

Q. Does it link to business continuity?

A. Yes. Security events often trigger continuity plans, so ISO 22301 integrates well.

Q. Does it cover cyber threats?

A. It covers security risks broadly; detailed cybersecurity is better addressed with Cyber Trust or ISO/IEC 27001.
